

Pharmacological Center "INKAR", in "Terekty", the Karasay area, Almaty region

Field of Activity

Center of handling of pharmacological freights

Task

To create the Specification on designing on the basis of requirements of the customer and to execute design estimates preparation on low-current networks:

- Alarm system
- Automatic fire alarm system
- Monitoring system and management of access
- The structured cable systems
- Video surveillance system
- System of automatic gas fire extinguishing
- System of automatic water fire extinguishing

Decision

The project department of our company developed the project for the pharmacological organization INKAR. The main complexity in case of the solution of this task, there was a numerous change architecturally planning decision. As a result the design estimates were transferred to the customer.
