Task

To our company the task was set - to develop the project, to execute installation and start-up - adjustment of systems of the fire alarm and the speech notification on squares leasable rooms.

Decision

During the solution of this task, we prepared projects for each of more than 180 lessees. The matrix of interaction of APS with engineering systems of the building is created, fire-proof systems and speech notification system.

Installation works of the equipment of the automatic fire alarm were performed (Simplex), and system of the speech notification (Bosch, Plena) which can serve for translation of background music and the notification of guests in case of state of emergency.

After installation of all systems by the main task there was a programming of system of automatic fire alarm system on a basis of developed scenarios of interaction of all engineering systems and safety systems "Esentai Mall" buildings for ensuring fire safety of shopping and recreation center and its visitors
