

ABN-Amro(RBS) office in Almaty

Industry:

Banking

End User:

Joint Stock Company "RBS (Kazakhstan)".

Is an expert in a field of corporative and institutional service for clients and is a leading bank partner for corporations, financial and state institutions all over the world, that fact maintain a wide range of different services on risk management and investment.

Business Objection:

To equip the bank with following systems: intrusion system, access control system, CCTV system.

Solution:

The installed CCTV system which is intended to implement the security functions in order to maintain the rules, to prevent and investigate crimes by means of watching the entrances of the bank and limited internal areas (technical rooms, corridors, server rooms etc.). The system records the images from IP cameras in day and night regimes with the help of special DVRs.

The system works on the base of installed DiBos software.

Result:

CCTV system works without failures. DiBos software recommends itself as a high-quality product which can work with server equipment of any other producer.

Installed by:

CSI-Kazakhstan Ltd.
