## **Industry:**

### **Public institution**

#### ***The Residence of the President of the Republic of Kazakhstan***

*Built on the territory of new administrative center of Astana on the left bank of Ishim river. The total square of the building is 36720 m<sup>2</sup>. The official presentation of the new Presidential Palace was held on December 24, 2004.*

## **Business Objective:**

The managing board of administrative buildings held a tender on purchasing services and endowment for the new residence of the Republic.

Necessary objects to be equipped:

- A hall for the press conferences, meetings between the President of the Republic and representatives of mass-media.

- The Oval Hall (is used for the highest-level negotiations between Kazakhstan's and foreign delegations, meetings and negotiations between the President of the Republic with foreign delegations and representatives of foreign business circles.

- The Hall of the Security Council (is used for holding meetings of the Security Council of the Republic of Kazakhstan)

- The Dome Hall (is used for the highest-level meetings of the Head of the States, conferences between the President of the Republic with the representatives of the ministries, parties, the creative intellectuals, etc)

- The Meeting Hall (is used for the conferences between the President of the Republic and the Government of the Republic)

-The Negotiations Hall (is used for the meetings between the Head of the Administration of the Republic, the Assistant

The main task was to install the equipment without damaging the unique interior.

## **Solution:**

In equipping the above-mentioned halls the following production was used: DCN-NG, DCN, DCN-Wireless, conference systems, Integrus based systems of simultaneous translation. The sound amplifying system was made on the basis of Plena and Intellivox equipment. AutoDome cameras were used for video records of the conferences.

## **Result:**

One of the most important buildings in the Republic was provided with the best systems. Appointments of foreign delegations, conferences and consultations with the representatives of the ministries are never held without BOSCH conference systems.
