

The Ministry of International Affairs of the Republic of Kazakhstan

Industry:

The central executive institute of the Republic of Kazakhstan which implements foreign-policy of the Republic and leads the system of republican diplomatic structure.

End User:

Economic management of the Ministry of International Affairs of the Republic of Kazakhstan

On April 16th, 2005 the new building of the Ministry of International Affairs was officially opened. This object was built by the Swiss company Mabetex. Both internal and external styles are very pleasant and harmonious. The new building is twice bigger than the previous one, consists of 5 floors and its area is almost 20000 m2.

Business Objection:

To equip the halls with conference systems with the possibility of simultaneous translation.

Solution:

In order to fulfill all increasing requirements for organizing international conferences and multi-languages symposiums it was decided to install the systems of simultaneous translation and systems of channels distribution.

The system of simultaneous translation is based on DCN technology and supports up to 32 channels of translation.

Result:

The installed equipment provides the absence of loss in quality of sound, legibility and the full absence of background noise, interferences and has very positive influence on all events in these halls and the general impression of the technical level of the building is very good.
