

Shell's central office in Astana

Industry:

Oil production

End User:

Shell office in Astana

Shell is the largest company which has its filials in more than 110 countries all over the world. The company takes part in several projects in Kazakhstan. These projects are The North Caspian project, "Pearl" project, "Arman" project and also the Caspian pipeline consortium.

Business objection:

To adopt the access control, intrusion and CCTV systems on the territory of the central office.

Solution:

CCTV system in Shell office is installed with the use of Vidos video management system and Dinion and Flexidome IP cameras. The data are registered by Raid-storage.

Result:

CCTV system allows to see the real video material and archive files from Raid- storage on any computer connected to the network in case of having the right of access.

Installed by:

Filial of CSI-Kazakhstan Ltd.
