

Exhibition center

Industry:

Exhibitions

End User:

“Korme” exhibition center

Special building for International exhibitions is situated on the left bank of Ishim close to the National Archive.

Business Objection:

According to the order of the main contractor it's necessary to provide the premises with the public address system, conference system and congress systems.

Solution:

The following equipment was used for public addressing: LS1 UC 20E. The main difficulty was concerned in the height of the level that was something about 8 meters. DCN Wireless with the simultaneous translation to 8 languages was chosen for the conference room.

Result:

The guests and the staff are very glad of the high quality of the equipment, good quality of all kind of sounds: music, announces, etc.
