KaR-Tel LLP - one of leading Kazakhstan mobile operators of the GSM-900 standard, providing services under the K-Mobile, Beeline and EXCESS trademarks. More than 1 600 000 active subscribers were connected to the middle of 2005 to a network. The annual turnover of the company constitutes more than 160 million USD. The KAR-Tel LLP mobile operator with the Beeline trademark is included into VimpelCom group of companies.

## Task

To equip the building with systems protection of the alarm system, video surveillance and the monitoring system and managements of access

## Decision

Call Center was equipped with video surveillance system thanks to which is performed continuous control of the protected territory at any time. It allows employees protection to trace any non-staff situations. The monitoring system of access reliable and convenient in operation answers all necessary to requirements imposed to systems of such class. Automatic control of an entrance and exit of people to premises of office, differentiation of zones of access ensure safety as employees, and corporate property.
