The Republican Cartographical factory

Industry

Cartography

End User:

A cartographical factory is an enterprise which publishes maps, plans, atlases and other cartographical production.

Business Objection:

The objection was to equip the factory with the following systems: access control system, public address system, fire alarm system and CCTV system.

Solution:

As the End User decided the type of public address system was Plena with 6-zonal preamplifier.

CCTV system was based on using Dinion and Flexidome cameras.

Result:

During the installation period the fact of theft was found out. The CCTV system successfully implements its functions now as the all other systems do.
