

Luxor Fitness Center

Industry:

Sport and health

End User:

Fitness Center which uses the latest innovations in the sphere of SPA, beauty industry, nutrition, design and multimedia.

Business Objection:

To equip the complex with the public address system (alarms and background music) and CCTV system with several purposes.

The primary task was to improve the security level and safety of clients and their cars. Secondly, it was necessary to watch the training process in order to appraise the level of occupancy in order to use the time correctly. Thirdly, CCTV system must have become an instrument which could give the information for the fastest reaction.

Solution:

The choice was done for using Bosch equipment as the company recommend itself as the most safe system with simple control and good price. The system was installed in the following areas: gyms, aerobic gyms, bar, parkings. The information is saved on Divar videoregistrator. Autodome and Flexidome cameras were chosen for permanent automatic monitoring and control.

Result:

The installed equipment corresponds to all requirements of the center.
