

Parliament

Industry

Legislation

End User

Majilis

- lower chamber of the Parliament.

The parliament is situated near the main square of the new administrative center, the Residence of the President, the Supreme Court building and Senate and consists of complex of 4 blocks, 22 floors building and a hall for the joint conferences of both chambers of Parliament. The buildings of Majilis and Senate are connected between each other by a gallery.

End User

Senate

-higher chamber of the Parliament

The parliament is situated near the main square of the new administrative center, the Residence of the President, the Supreme Court building and Senate and consists of complex of 4 blocks, 22 floors building and a hall for the joint conferences of both chambers of Parliament. The buildings of Majilis and Senate are connected between each other by a gallery.

One of the important element of the element – a hall for 400 places for joint conferences of both chambers of the Parliament, a hall for 150 places which is used for plenary conferences of chambers of Parliament.

Business Objective:

The End User decided to equip the main halls with the modern conference system with the possibility of simultaneous translation and visualization of the information. The special feature of the project was the necessity to russify the video client and also translate it into the state language.

Result:

The specialists of the company translated the video client program into state (Kazakh) language.

Halls for joint conferences of both chambers of the Parliament were equipped with DCN NG conference systems.
